Work History

Web Developer

Smarttechno (POS terminal provider in Uzbekistan), Tashkent

- Developed and maintained the company's websites (smartone.uz, smarttechno.uz), leveraging HTML, CSS, JavaScript, and Python-based frameworks (Django, Flask, FastApi).
- Engineered a key component of a video calling application using Python/Django, specifically a signaling server, improving internal communication and efficiency.

2022-01 - 2023-07

2020-01 - 2023-05

Education

Bachelor of Science: Management Information systems

Webster University - Tashkent, Uzbekistan

- Created an automated system for around 10000 customers to add their registered products directly from the government product registration website, enhancing customer experience and streamlining the product registration process.
